

Helix Coil Vending Machines

Dimensions:

Size: 77" h x 35" w x 35" d
Weight: 575 pounds

1sourcevend's helix coil machines are time-tested and built in the USA for industrial environments. Ideal for high-value/high-turn product dispensing, 1sourcevend inventory replenishment and control software included in every unit.

Use to vend:

Safety/PPE supplies, fasteners, welding supplies, maintenance supplies, cutting tools, abrasives, adhesives, sealants, batteries, and more.

Specifications:

Available in full-size, tabletop and refrigerated coil units. Design your own helix coil vending machine based on your product vending needs. Coils can be placed as close together or far apart as needed, and coils come in multiple sizes.

Coil Capacity:

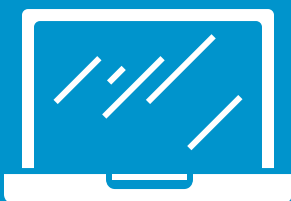

- 3 coil diameter sizes with slot size options
- Maximum item size: 6" x 14"
- Tray height clearance: 6.5"
- Rail kits, mini-dispensers and splitters available to increase capacity and vend odd-shaped or very small items like drill tips or batteries
- Custom setups available for most applications

Features:

- Intuitive high-resolution touchscreen
- Easy-to-understand planogram with pictures and descriptions
- Embedded 4G cellular, Wifi and hardwire connectivity
- Modular design for easy configuration onsite
- Training manual for machine setup and software support
- Drop sensor technology
- LED lighting

Benefits:

- 24/7 secure access to inventory at point of use
- Restrict use by item, employee, hour, day, week or month
- Remote login capability for diagnostics
- Reduce inventory consumption by 30%+
- Streamlined purchasing
- Decreased inventory shrinkage
- Interoperability with other machines onsite
