

Locker Vending Machines

1sourcevend's check-in, check-out locker vending machines are reliable machines built in the USA for industrial environments. Ideal for high-value and reusable items, 1sourcevend inventory replenishment and control software is included in every unit.

Use to vend:

High-value items like power or hand tools; reusable items like paint or MRO supplies; and PPE items like safety vests or goggles. Anything that fits in a square hole can be placed in a locker vending machine.

Specifications:

Design your own locker vending machine based on your product vending needs.

Capacity:

- Up to 24 item sections

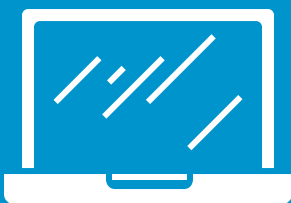

Dimensions:
Size: 72" h x 44" w x 21" d
Weight: 410 pounds

Features:

- Intuitive high-resolution touchscreen
- Easy-to-understand planogram with pictures and descriptions
- Embedded 4G cellular, Wifi and hardwire connectivity
- Check-in, check-out capability
- Large viewable area inside each locker
- Training manual for machine setup and software support
- LED lighting
- Easy maintenance

Benefits:

- 24/7 secure access to inventory at point of use
- Restrict use by item, employee, hour, day, week or month
- Remote login capability for diagnostics
- Control and track access of items for reuse
- Reduce inventory consumption by 30%+
- Streamlined purchasing
- Decreased inventory shrinkage
- Interoperability with other machines onsite
