QR / Barcode Scanner

Keep up with inventory in any variety of our industrial vending machines as well as those in customers’ tool cribs and part bins with the 1sourcevend QR/ Barcode Scanner. Automated reports combine QR code and barcode scanned data with connected machines to help customers reduce inventory waste, identify usage trends and maximize profits.

“We are excited to be fully connecting our proprietary inventory management software, industrial vending machines and customer tool room bins for distributors to offer the most modern and robust solution to their customers.” – Mark Hill, President

Features:

- 8” display Samsung tablet
- Pre-loaded software app
- Scans barcodes and QR codes
- Product information presented in “augmented reality”
- 4G cellular, Wifi
- Long-lasting and replaceable batteries
- No Battery mode saves energy for all day operation
- Anti-shock and water-resistant casing

Benefits:

- Scan inventory item barcodes stored anywhere
- Streamline purchasing
- Decrease inventory shrinkage
- Sync inventory data with or without vending machine inventory in software for complete reporting
- Training, setup and ongoing support provided
